

Shark Sighting Annual Stats

Number of Great White Sharks sighted & recorded on our **DAY** trip

See below for full details from 1 January 2011 to date. From 1st April 2013 the Department of Environment, Water and Natural Resources introduced Charter Free Days referred to as 'Non Activity Days'. These are days that no charter operators are permitted to conduct tours to the Neptune Islands. The purpose is to allow for the ongoing monitoring and research into shark activity and behaviour at the Neptune Islands.

Shark Sightings Calendar

Due to the nomadic habits of the Great White Shark and the fact we are dealing with animals in their natural environment, we cannot guarantee a shark sighting at any time of the year. To assist you in making your decision on when is the best time for you to book your charter with us, we provide you with the number of sharks we have encountered on each of our trips to the Neptune Islands in the past two years. This is a very accurate record of Great White Sharks sighted at the Neptune Islands. This information is also provided to SARDI and Department of Environment and Water to assist with their ongoing research into shark activities and behaviours. Occasionally we will also encounter bronze whaler and mako sharks. These figures do not include the sightings of these species.

- * If there has been a Charter Free Day this is indicated with **CF**
- * If there has been no charter this is indicated with **NC**
- * If no sharks were sighted on a charter this is indicated with **NS**
